## **Care and safety information**

(page 3 – P2)

### **Avoid high temperature, moisture, water and dust**

- Do not expose the system, batteries or discs to humidity, rain, sand or excessive heat (caused by heating equipment or direct sunlight). Always keep the disc tray closed to avoid dust on the lens.
- No objects filled with liquids, such as vases, shall be placed on the apparatus.
- No naked flame sources, such as lighted candles, should be placed on the apparatus.

### **Avoid condensation problem**

- The lens may cloud over when the system is suddenly moved from cold to warm surroundings, making it impossible to play a disc. Leave the system in the warm environment until the moisture evaporates.

### **Do not block the vents**

- In a cabinet, allows about 10cm (4 inches) of free space all around the system for adequate ventilation.

### **Care of disc**

- To clean a CD, wipe it in a straight line from the centre towards the edge using a soft, lint-free cloth. A cleaning agent may damage the disc!
- Write only on the printed side of a CDR(W) and only with a soft felt-tipped pen.
- Handle the disc by its edge, do not touch the surface.

### **Care of the cabinet**

- Use soft cloth slightly moistened with a mild detergent solution. Do not use a solution containing alcohol, spirits, ammonia or abrasives.

### **Finding a suitable location**

- Place the system on a flat, hard, and stable surface.

### **Built-in safety circuit**

- Under extreme conditions, this system may switch to standby mode automatically. If this happens, let the system cool down before reusing it.

### **Power saving**

- This system is designed to use less than 1W of electricity when switched to Eco Power standby. Disconnect the AC power cord from the power outlet when not in use.
